- c) When the after-sales service personnel describe the replacement systematically, the replacement processing will be applied.

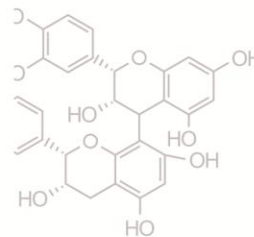

## Vf03 Luxury series pitcher type hydrogen water generator

With function of rich hydrogen water producing, heating , auto cleaning, beauty water , active mineral water

## PRODUCT MANUAL

Please read the product manual carefully before use

# What is hydrogen water?

AN OPTIMAL NATURAL  
ANTIOXIDANT

**Hydrogen-rich water** is also known as Hydrogen Water, in which the amount of hydrogen could be dissolved into. It is called Hydrogen Water in Japan. It tastes very neutral, and has no difference with drinking water or pure water. It is without color and taste and smell. Hydrogen itself is the best natural antioxidant, so the water added with hydrogen has a strong reduction function, which can neutralize the blood in the body and reactive oxygen species (free radicals) in the cells.

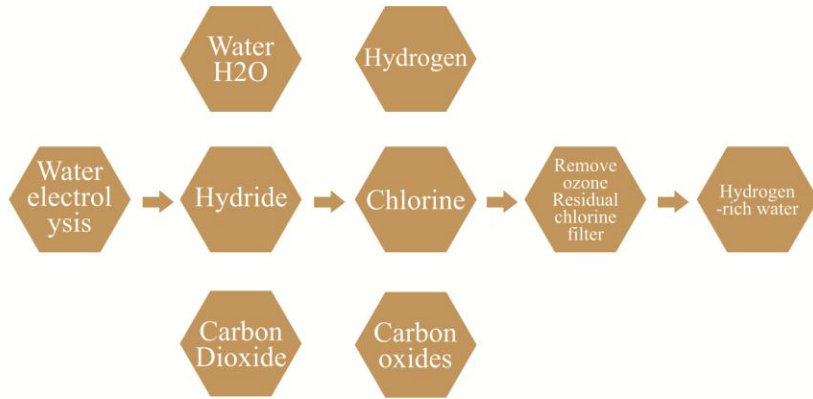

# What hydrogen water can do for you?

GIVE YOU A GOOD  
CUP OF GOOD HEALTH

## Working Principle for Hydrogen Cup

CHLORINE, OZONE FILTER  
TECHNOLOGY IN JAPAN

The electrolysis of hydrogen-rich cup can produce hydrogen reduction, which will effectively remove free radicals, including reactive oxygen species etc. Hydrogen has been shown to have a selectively antioxidant effect for human body. By selectively antioxidant, it can form a healthy body, which subverts the idea that "It is drug that has side effects for human body". When hydrogen-rich water comes into the human body, there are no side effects. It just takes away free radicals of reactive oxygen which is harmful for the human body, and form non-toxic and harmless water which can be excreted outside the body. Note: Pour pure water or mineral water at room temperature into hydrogen-rich cups. No cola, soft drinks and any other carbonated drinks.

## Product use method

INTELLIGENT HUMANIZED  
PROGRAMMING

### Instructions

Press the key to touch the button, each button after a successful response, the buzzer with "drop" sound, enter all the work mode need to complete the selection function button 1 second after entering.

1. On / Off: In the shutdown mode, touch the "Switch" button, the system enters the standby mode; in the standby mode, touch the "switch" button, the system shuts down, all other keys are unable to operate.

2. Water key: touch the water key once, the system default water 8 seconds (150ML water, about a cup of disposable cup capacity) and automatically stop the water; touch the water button for 2 seconds, microcomputer program automatically for the unlimited water mode, again Touch the water key to stop the water.

3. Anti-cleaning key: touch the "anti-wash" button, the system into the anti-cleaning state. If you touch the "anti-wash" button again, the system stops anti-cleaning.

4. Temperature button: touch the "constant temperature" button, the system into the constant temperature of water (water temperature constant at 45 ℃). If you touch the "constant temperature" button again, the system stops the constant temperature water.

5. Hydrogen-rich water key: touch the "hydrogen-rich water" key, the system into the water-rich water low water state; again touch the "hydrogen-rich" button, the system into the water-rich water state water state; "Hydrogen-rich water" key, the system into the water-rich water depth of the water state; if you touch the "hydrogen-rich" button again, the system stops hydrogen-rich water state.

6. Beauty water key: touch the "beauty water" button, the system into the beauty of water water state. If you touch the "beauty water" button again, the system stops the beauty water.

BODY DESIGN

### Product parts schematic

Product name:	Hydrogen-rich water machine
Rated Capacity:	2500ML
Electrolytic power:	20W
Rated voltage:	220V
Heating power:	220W
Rated frequency:	50Hz

## Hydrogen water can protect your health

ANYTIME AND ANYWHERE  
DRINK WATER

Hydrogen water can protect your health at anytime and anywhere. People are not in the pursuit of clean water, but in the pursuit of good water that can improve the human health. Hydrogen-rich water has been widely used in medical, auxiliary health care and beauty as well as any other industries in Japan. All are free to drink, especially white-collar workers under pressure, athletes, sub-health groups, beauty, pregnant women and the crowd with the need for health care.
